***Claim Rejections - 35 USC § 112***

3. Claims 18 and 20-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In order to distribute charitable amounts as recited in claim 15, the coin collection and retention devices would have to be first accepted from the consumers. Consequently, the accepting limitation in claims 18 and 20 is unclear. It appears the accepting limitation should be included in claim 15.

5. In claim 21, line 4, the phrase “and/or” renders the scope of the claim unclear.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 21, 22, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silcox (US#D304644) in view of Ricciardi (US#2731226).

8. Regarding claim 21, Silcox discloses a coin collection and retention device (Fig. 1) receiving coins in its front end in its “donation box”; and a commercial entity advertising a product adjacent the rear end of the device in its “advertising holder”, the inherent advertisements being viewed as on the exterior of the device.

9. Silcox fails to specifically disclose advertising a charitable entity on the exterior of the device. However, Ricciardi discloses in col. 2, lines 51-55, a coin collection and retention device 29 having an advertisement of the associated charity on the exterior thereof such that the donor is clearly informed of the specific charity to which they are donating. Therefore, as taught by Ricciardi, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Silcox by advertising a charitable entity on the exterior of the device such that the donor is clearly informed of the specific charity to which they are donating.

10. Regarding claim 22, the device is inherently accepted so that the donations can be collected.

11. Regarding claim 27, Silcox disclose a free sample product, namely the inherent confectionary in the confectionary tray portion of the device.

12. Regarding claims 21, 22, and 27, Silcox in view of Ricciardi discloses all the claimed structure require to perform the claimed method, and under the principles of inherency, if a prior art device, in its normal and usual operation, would necessarily perform the method claimed, then the method claimed will be considered to be anticipated by the prior art device. When the prior art device is the same as a device described in the specification, it can be assumed the

Art Unit: 3677

device will inherently perform the same process. *In re King*, 802 F.2d 1324, 231 USPQ 136 (Fed. Cir. 1986).

***Allowable Subject Matter***

13. Claims 10-17 and 19 are allowed.

14. Claims 18, 20, and 23-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

15. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

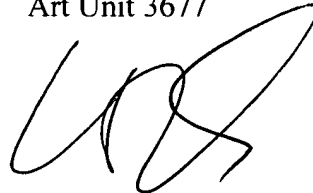

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
